User Manual: Secure User Login Feature

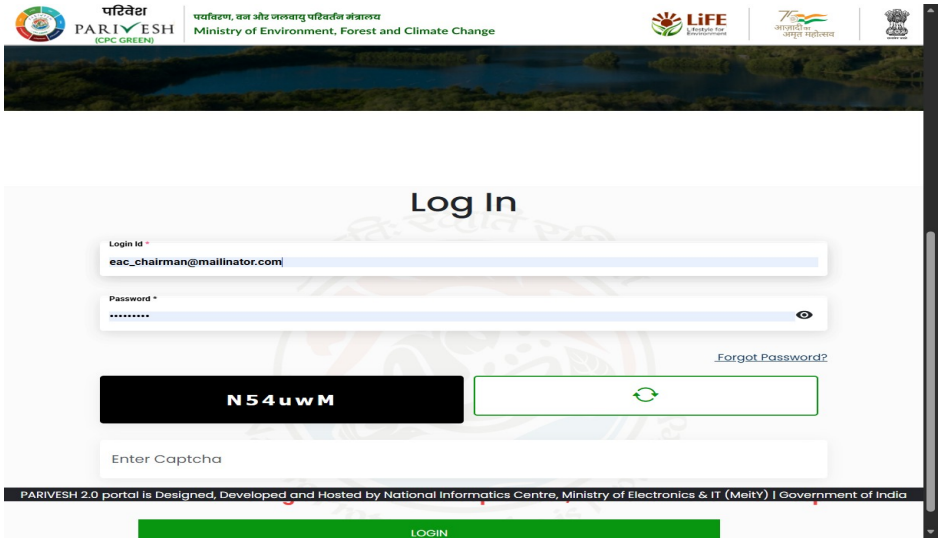
Introduction

The FRS (Flexible Registration System) is a secure authentication feature that enables users to access systems safely. It provides a reliable and efficient way to manage user identities.

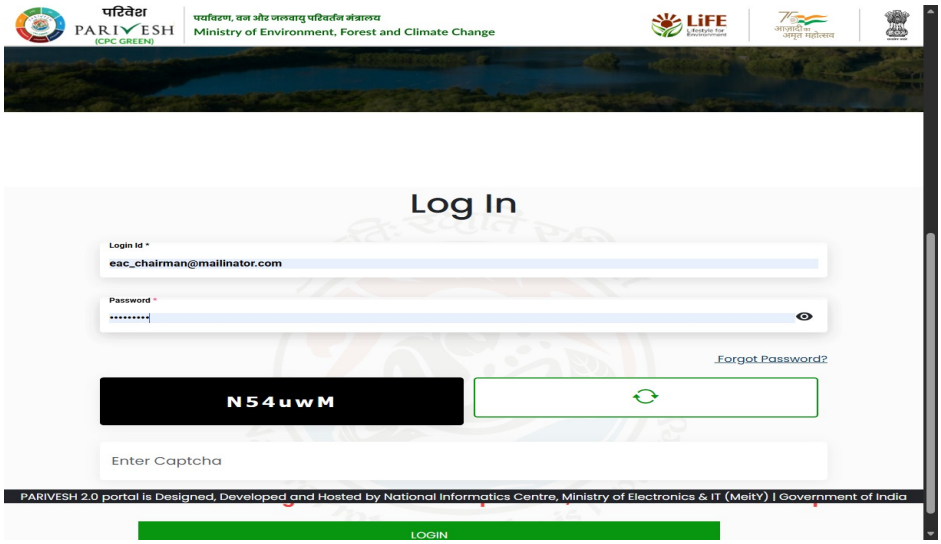
Purpose

The purpose of FRS is to allow users to login securely using their credentials, protecting their accounts from unauthorized access. This feature aims to provide a seamless and secure authentication experience for users.

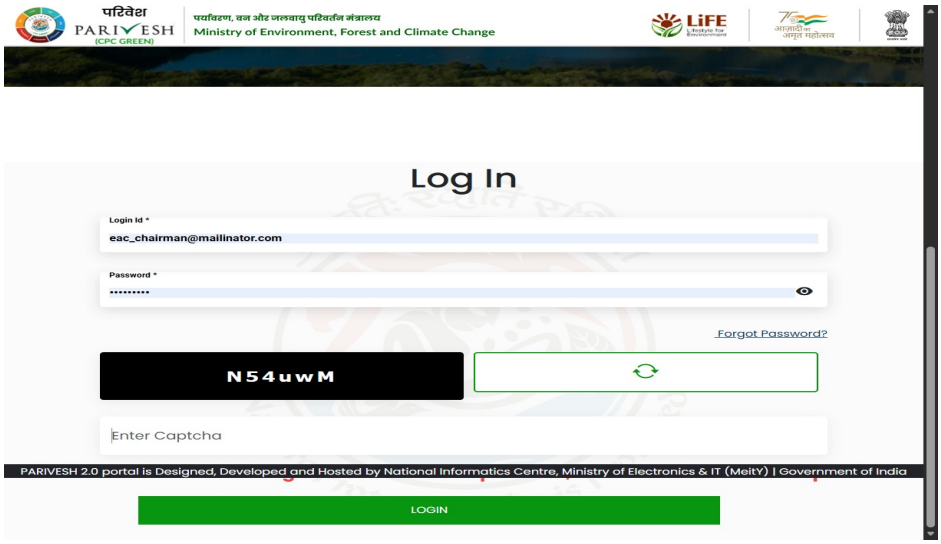
Steps



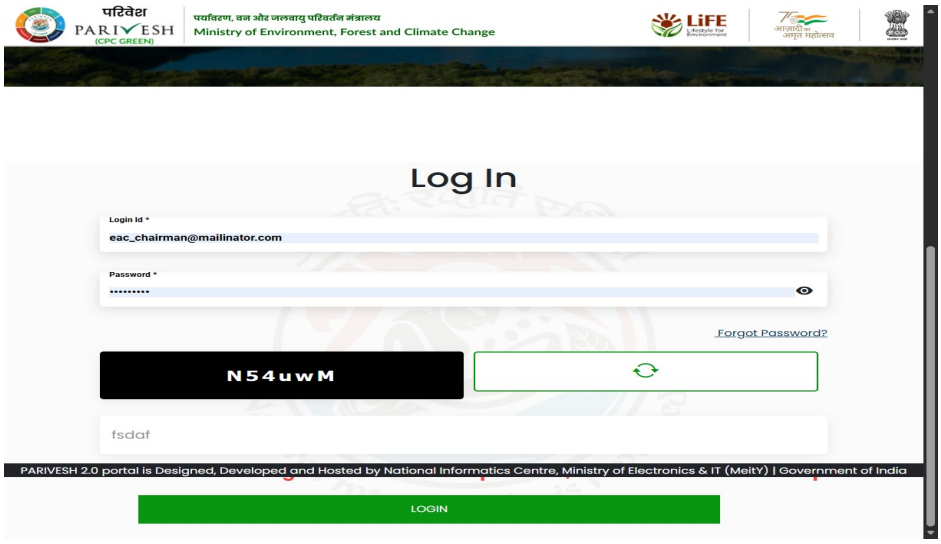
Step 1: Click Enter email button



Step 2: Click Enter Password button



Step 3: Click Enter Captcha button



Step 4: Click LOGIN button
